Portfolio: jnalewajk.me

AVAILABILITY

Location: Warsaw, Poland
Job type: Full-time
Available: 1 month notice

SKILLS

Core
HTML, CSS, JavaScript, TypeScript

Libraries & Frameworks
React, Next.js, Astro

Styling
Tailwind CSS, Sass

UI & Component Libraries
Radix, Mantine, Ant UI, Ark UI, Shadcn UI

Forms & Validation
React Hook Form, Zod

Data & State Management
TanStack Query, Zustand, nuqs

Testing
Vitest, Testing Library, Playwright

Architecture & Tooling
Nx, Turborepo, Storybook

Backend & CMS
Node.js, Express, NestJS, PostgreSQL, MongoDB, Prisma, Drizzle ORM, Supabase, Strapi

AI Tools
Cursor, Claude Code, Vercel AI SDK

DevOps & Infra
Docker, AWS, Git, GitHub Actions, Sentry

Other
Accessibility, Rest API, OpenAPI, Figma

LANGUAGES

- **Polish** - Native
- **English** - C1

EDUCATION

WSB Merito University
Engineer's degree, Computer Science
01/2023 – 07/2026

HOBBIES

- Powerlifting
- Traveling
- Healthy cooking

PROFILE

Fullstack Developer with **3+ years of experience** building web applications in the Next.js ecosystem, from database design and APIs to accessible UIs. Promoted to **Frontend Lead** within 3 months at current company. Promoted to lead roles at both companies I've worked at. I take projects from schema design to deployment and prefer building things from scratch over maintaining legacy code.

WORK EXPERIENCE

Frontend Developer

CodeYourBrand | October 2025 - present

Frontend Lead (January 2026 - present)

- Promoted to **Frontend Lead** after delivering the Maspex project ahead of schedule. Full technical ownership of the Dubai Real Estate platform.
- Designed a **4-tier Nx architecture** with **5 domain modules** (Next.js, Strapi CMS). Built the project's Design System (**20+ components**) with Ark UI and Storybook.
- Run **code reviews**, manage releases, and monitor production stability via Sentry alerts integrated with Slack.
- **Estimate tasks**, translate business requirements into technical decisions, and explain trade-offs to non-technical stakeholders.
- Maintain repository health: dependency updates, vulnerability patches, and **automated deployments** via GitHub Actions.
- Delivered a **homepage redesign** for the **TwoContinents** travel platform. Review PRs across the team.

Mid Frontend Developer (October 2025 - January 2026)

- Solo frontend developer on **Maspex Photo Service**: rebuilt the photo service app and admin panel for a major FMCG company. Delivered in **under 6 months**. Optimized bundle size by **~30%**.
- Created a custom component library on **Shadcn UI** with Turborepo and Next.js. Feature-driven development approach.
- Integrated **AI-powered animation generation** from prompts and images into the platform.
- Worked closely with **business, designers, and backend developers** on requirements and technical proposals.
- On-time delivery led directly to **promotion to Frontend Lead** within 3 months of joining.

Frontend / Fullstack Developer

Haergi | August 2023 - October 2025 | Warsaw, Poland

Fullstack Developer (August 2024 - October 2025)

- Built **InstagoAI** from scratch, an AI website builder for small businesses (Next.js, Express, MongoDB, TypeScript). Owned the full stack: auth, backend, frontend, database modeling, AI workflows.
- Built a B2B e-commerce platform for **Mezze Foods** (Warsaw restaurant) on top of InstagoAI, integrated with **LeadMe AI** for orders, invoicing, and client messaging. Handled **3,500+ orders/month**.
- Wrote an **AI-powered i18n tool** for CI/CD that auto-generated translations for **15+ languages** across **~1,500 keys**, removing manual translation work from all company projects.
- Worked directly with business on requirements in a small **3-person team**, delivering features end-to-end.
- Set up **CI/CD pipelines** (GitHub Actions) for automated deployments across multiple projects.

Frontend Developer (August 2023 - August 2024)

- Started on **landing pages** for startup products. Promoted to fullstack after demonstrating strong technical initiative.
- Built the fullstack **LeadMe AI** platform, a SaaS for automating customer tasks and tracking operations (React, React Query, Express).
- Implemented **responsive, pixel-perfect UIs** with accessibility (a11y) in mind.
- Worked in agile: daily standups, sprint planning, retrospectives.

PROJECTS

Pill Pilot

Next.js 16, TypeScript, PostgreSQL, Drizzle ORM, Vercel AI SDK, Docker, VPS

- Fullstack PWA for supplement tracking. Two-step **AI parsing pipeline**: upload a treatment protocol and it auto-links to your supplement inventory.
- **PostgreSQL schema** (8+ tables), repository pattern, Drizzle ORM migrations, next-safe-action for type-safe server actions.
- Tested with **Vitest**, **Testing Library** (unit + integration), and **Playwright** (e2e).
- Self-hosted on **Hetzner VPS** via Docker and Dokploy. Web push notifications (VAPID) and a stock forecasting engine based on cycling schedules.

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
